Ayush Singh

MBA' 27 VGSOM IIT KGP | Lean Six Sigma Green Belt | Ex- Nayara Energy | VIT-22
India

Summary

A performance-driven professional with a Lean Six Sigma Green Belt and a passion for operational excellence, I bring a strong blend of technical expertise, strategic thinking, and people-oriented leadership to the table.

I'm a results-oriented professional with a background in engineering and a strong interest in operational strategy, process improvement, and team leadership. With over two years of experience at Nayara Energy, I've grown through hands-on roles in plant operations and project management, building a practical understanding of how large-scale systems function—and how they can be improved with the right mindset and collaboration.

Having earned a Lean Six Sigma Green Belt, I've developed a structured, data-driven approach to problem-solving. Whether it's streamlining workflows, identifying inefficiencies, or aligning cross-functional efforts, I work with a clear focus on outcomes without losing sight of the people behind the process. I've learned to balance precision with flexibility, particularly in high-pressure environments where quick decisions, teamwork, and accountability are critical.

Academically, I was awarded a merit scholarship in college in recognition of consistent performance and discipline. That recognition meant a lot to me—not just as a personal achievement, but as a reminder that effort over time really does pay off. It's a belief I continue to carry with me today.

Those who've worked with me often describe me as organized, proactive, and grounded. I take pride in being the kind of person who brings clarity into chaos, whether that's through meticulous planning or simply helping a team stay focused on the next step. Outside of work, I find that music—especially singing—helps me reset, refocus, and return with a clear mind. It's a habit that has helped me stay

composed and collected through some of the more intense moments of my career.

Looking ahead, I'm excited to take on broader responsibilities where I can continue to grow as a manager and contribute to larger, purpose-driven initiatives. I'm especially interested in roles that combine operations with leadership, where I can support both business outcomes and the people who make them happen.

Let's connect if you're looking for someone who brings structure, sincerity, and steady focus to the table—someone who believes in building systems that work and teams that trust each other.

Experience

IIT Kharagpur - Vinod Gupta School of Management
Coordinator, Admission Committee
August 2025 - Present (10 months)

Responsible for facilitating the admission process in liaison with the faculty advisor, interacting with MBA aspirants, and helping them make an informed decision effectively.

TGHC - The Good Health Clinic
Live Project - International Expansion
January 2026 - April 2026 (4 months)

- Worked on a strategic consulting project focused on international expansion for a Longevity Clinic business model, assessing high-potential global markets using demographic, regulatory, and healthcare infrastructure indicators.
- Conducted in-depth market sizing, segmentation, and competitive benchmarking, identifying key customer segments and evaluating global longevity clinics' service offerings across preventive and regenerative healthcare.
- Evaluated regulatory frameworks and entry barriers across shortlisted geographies, including healthcare compliance, medical licensing, and cross-border operational constraints.

- Designed a market entry strategy, including go-to-market approach, partnership models (with hospitals, wellness centers, and research institutions), and phased expansion roadmap.
- Built a financial viability model, incorporating pricing strategy, cost structures, projected revenues, and break-even analysis for clinic operations.

LeMiCi IQ

Market Research Intern

December 2025 - March 2026 (4 months)

- Conducted multi-sector market research: Analyzed 3+ sectors (Horticulture, Pharma, Skill Development) using structured frameworks (market sizing, value chain mapping), delivering 10+ actionable insights that supported strategic decision-making.
- Evaluated government education policies: Assessed 5+ ministry initiatives by analyzing institutional structures and program outcomes, improving clarity on policy impact and implementation gaps for internal stakeholders.
- Developed Jewellery Sector Ontology: Built a comprehensive industry ontology covering 20+ value chain elements and stakeholders, enabling structured intelligence mapping and improving research efficiency by ~25%.
- Executed institutional mapping: Identified and analyzed 15+ industry associations and regulatory bodies, providing insights on sector influence networks and governance dynamics.
- Supported healthcare pilot project: Contributed to feasibility and workflow analysis for a Goa Dental Hospital pilot, helping outline operational processes and improving project readiness.
- Delivered data-driven insights: Synthesized large volumes of qualitative and secondary data into structured reports and presentations (8–10 deliverables) that enhanced stakeholder decision-making speed and clarity.
- Maintained high-quality documentation: Created well-structured research reports and knowledge repositories, ensuring 100% traceability and consistency across project outputs.
- Applied advanced research methodologies: Leveraged comparative analysis, benchmarking, and policy review techniques to derive high-impact strategic recommendations.

Decodskills

Live Project - AI-Powered Automation for Small Businesses (Strategy and Growth Consultant)

January 2026 - February 2026 (2 months)

- Conducted SME market research to identify automation gaps, major growth constraints, and opportunities
- Framed user-centric problem statements and evaluated AI automation solutions using design thinking
- Designed, validated end-to-end AI workflows, and delivered actionable insights through structured reports

Nayara Energy

Assistant Manager

July 2022 - July 2025 (3 years 1 month)

Jamnagar, Gujarat, India

Key Project Highlights:

- Part of Nayara Energy's first petrochemical transition initiative, contributing to the strategic shift toward higher-value chemical production for which I was involved in the Fluidized Catalytic Cracker (FCC) revamp project, aimed at enhancing C2–C4 (lighter hydrocarbon) recovery, along with successful commissioning of the Propylene Recovery Unit (PRU).
- Presently managing Delayed Coker Unit (DCU) operations, including the ongoing Coke Drum Replacement Project, ensuring minimal downtime and seamless process integration.

Operational & Leadership Responsibilities:

- Supervise on-ground refinery operations, ensuring equipment reliability, optimized performance, and consistent output while leading a team of skilled personnel.
- Recognized for driving safety excellence, consistently enforcing safety protocols and environmental standards to maintain a secure and compliant work environment.
- Coordinated cross-departmental efforts to streamline workflows, improve turnaround times, and enhance overall productivity across refinery units.
- Actively contributed to process optimization, identifying bottlenecks and implementing solutions that improved efficiency and reduced operational risks.

Recognitions & Achievements:

Safety Champion (June–Dec 2024) – for outstanding commitment to operational safety and proactive risk management.

Near Miss Reporting – 2nd Runner-up (2024) – for high vigilance and contribution to incident prevention culture.

“GEM” Token of Appreciation – for achieving zero steam leak in DCU operations, demonstrating a high level of attention to detail and preventive maintenance.

My Equation

5 months

Team Leader (Sales and Marketing Operations)

June 2023 - September 2023 (4 months)

- Successfully managed a team of 20 interns, providing guidance and instruction in sales and marketing strategies, resulting in a significant increase in sales of over 2 lakhs in a single month.
- Proactively organized and facilitated collaboration meetings with various organizations and colleges to promote and expand our upcoming programs, fostering valuable partnerships and opportunities for growth.

Sales and Marketing Operations Intern

May 2023 - June 2023 (2 months)

- Learnt about the fundamentals and types of Marketing, Marketing strategies, sales and related concepts.
- Achieved exceptional results by generating a substantial revenue of over 50K within a remarkable 15-day period.
- Leveraged college collaborations to effectively reach target customers and drive sales.
- Successfully implemented impactful email marketing campaigns, cold calls, and funneling techniques, resulting in heightened customer engagement and increased conversions.

Coprotect Venture

Product Research Intern

August 2021 - October 2021 (3 months)

- Engaged in a multidisciplinary research internship focused on product formulation, innovation, and market-fit analysis across healthcare and water filtration domains.
- Conducted research on Thin-Film Composite (TFC) ion exchange membranes used in water filtration systems, analyzing their performance, potential applications, and market viability in sustainable water treatment technologies.
- Contributed to the design and conceptual development of an electric toothbrush, exploring features, ergonomics, and user experience while aligning product specifications with current market trends and consumer needs.

- Worked on the formulation of a Xylitol-based gel for oral healthcare, focusing on ingredient compatibility, therapeutic effectiveness, and product stability.
- Studied consumer behavior and competitor products to evaluate product-market fit, ensuring each innovation had a strong value proposition and real-world usability.

MakSpeed Technologies

Summer Intern

August 2021 - September 2021 (2 months)

- Completed a focused research internship exploring flow chemistry and its growing significance in the modern chemical industry.
- Studied the fundamentals of flow chemistry, including continuous processing techniques and their advantages over traditional batch processes—such as improved safety, scalability, and reaction control.
- Carried out an in-depth research project on Flow Ozonolysis, investigating its mechanism, operational benefits, and industrial applications.
- Compared flow ozonolysis with the conventional ozonolysis process, highlighting key advantages such as enhanced safety, reduced reaction time, better selectivity, and minimized risk of hazardous intermediates.
- Reviewed recent advancements and case studies from pharmaceutical and fine chemical industries where flow chemistry has enabled more efficient and sustainable production.
- Gained hands-on experience with scientific literature review, technical writing, and data interpretation, contributing to a deeper understanding of innovation in chemical process engineering.

Indian Institute of Chemical Engineers

Industrial Training OIP

February 2021 - April 2021 (3 months)

- Participated in an immersive training program designed to provide real-world exposure to chemical and industrial engineering processes across various sectors.
- Gained in-depth knowledge of cement industry operations, including raw material processing, kiln functioning, and environmental considerations in production.
- Developed an understanding of the design and datasheet preparation of centrifugal pumps and their role in fluid transport systems.
- Explored the design, safety, and operational principles of pressure vessels and their applications in high-pressure industrial processes.

- Studied the design, types, and working of different instrumentation used in chemical industries.
- Gained valuable insight into Naphtha Cracking processes and how it's used in the petrochemical industry to produce basic building blocks like ethylene and propylene.
- Explored the synthesis and applications of industrial polymers, understanding their properties and use in various engineering and consumer products.

Creativity Club VIT

Purchase and Logistics Head

May 2020 - April 2021 (1 year)

- Oversaw the procurement of materials, vendor coordination, and on-ground logistics for events ranging from cultural fests to technical workshops.
- Prioritized sustainable spending by negotiating with vendors, minimizing unnecessary expenses, and repurposing materials wherever possible.
- Promoted the judicious use of resources, ensuring minimal wastage and encouraging eco-friendly practices like reusable decor and digital communication.
- Played an active role in event planning, working closely with team leads to create detailed budgets, logistics checklists, and timelines.

Internship Studio

Energy Conservation and Management Intern

July 2020 - September 2020 (3 months)

- Completed a structured training program focused on the fundamentals of energy conservation, energy auditing, and sustainable energy management practices.
- Participated in case study-based learning and simulated energy audit projects to understand real-world energy management challenges and solutions.
- Studied the techno-economic aspects of energy-efficient technologies, including LED lighting systems, HVAC optimization, and renewable energy integration.
- Developed reports and presentations based on project simulations, showcasing findings and recommendations to improve energy usage.
- Learned to work with essential energy calculation tools and software to perform efficiency assessments and interpret data trends.

Play and Shine Foundation

Management Intern/Campus Ambassador

May 2020 - September 2020 (5 months)

- Led the planning and execution of 6+ online webinars and virtual events focused on guiding and empowering youth in sports, reaching over 500 participants nationwide.
- Collaborated with athletes, coaches, and professionals to deliver engaging, informative sessions.
- Took initiative in event coordination, speaker management, and digital promotion.
- Played a key role in outreach and engagement strategies to broaden the foundation's impact and helped expand our reach by over 30%.
- Demonstrated leadership, communication, and teamwork while working towards a shared goal of creating meaningful change through sports.
- Helped inspire and guide hundreds of young individuals to pursue their passion and careers in sports.
- Contributed to the foundation's mission of building a more inclusive and encouraging environment for aspiring athletes nationwide.

Education

IIT Kharagpur - Vinod Gupta School of Management

Master of Business Administration - MBA, General Management · (July 2025 - May 2027)

Indian Institute of Technology, Kharagpur

Master of Business Administration - MBA · (July 2025 - May 2027)

Vellore Institute of Technology

Bachelor of Technology - BTech, Chemical Engineering · (July 2018 - May 2022)
